# Precision Air 300 Series

**When Precision  
Matters Most  
Trust Protel Air**

Stand Alone  
LED Digital Air

The most advanced **Digital Air System** on the market today

**Converts any Standard Air Machine to a Full Digital Air Machine**

External Front Surface  
Mount DAC

Internal Flush Mount DAC

### Stand Alone (DAC-S 300)

The Digital Air Controllers (DAC's) can be installed to convert any Air Machine on the market to full Digital Air Machine.

The DAC provides the largest and brightest LED digital display lighting on the market today that can be seen at great distances.

### The DAC-S has the following standard features:

- Ultra-high intensity LED digital characters to display Setpoint & Tire Pressure
- Provides precision tire inflation or deflation of tires within (+/- 1 PSI)
- Display's the tire pressure as the air is metered to the tire
- Provides automatic shut-down of the air-pressure flow when the tire reaches the target PSI
- Set Point is adjustable between 15 psi to 80 psi and automatically falls back to default Set Point of 35 psi after each vend
- Automatically signals the operator with loud audible beep and flashing LED lights when the tire reaches the set point.
- Auto-resets when attached to the next tire
- Automatic "Flat tire seek" mode alleviates the need for a dedicated Flat Tire button
- "Quick-CAL" feature automatically recalibrates unit with a single button press
- Unit can be mounted internally in the Air Machine or externally via Surface Mount metal enclosure.

\*\* See DAC-M 400 brochure for additional features offered on the monitored version of LED DAC \*\*
