

Innovative solutions  
For the air vac industry

# Air Vac Pro AWM 310 Series

Vault Mounted  
AIR Machines

*Air Without Barriers*

## TAKE THE GUESSWORK OUT OF MACHINE PERFORMANCE

### Features

- Remotely monitor all activities including usage and performance
- Universal mounting plate to accommodate most popular compressors
- Modular design allows future upgrades and facilitate quick repairs & maintenance
- Air chuck hook / Magnetic air chuck holder (optional)
- LED Dome light, Front Panel light, Front & Rear sign lighting (optional)
- Mounts on concrete or stainless steel base

### Payment Options

#### Coin Acceptors

- Standard Acceptors
- Optical Acceptors - Reduces / Eliminates coin jams

#### Card Reader Option

- EMV Chip and Contactless payments
- Supports Apple Pay, Android Pay, and Samsung Pay
- Magstripe card reader for backward compatibility

#### Any Air

- Supports PayPal, Cashless, Google Pay, and Apple Pay
- Provides Receipt and custom generated ad
- Supports Alternate Payment Methods

#### Digital Air Option

- Stand Alone or Monitored versions available
- LCD or LED models available
- Inflates or deflates tire to specified pressure
- Digital Air with free tire pressure check and backlit display
- Remote programmable coin vend price viewable on display, eliminates need for labels on the monitored LCD version
- Hazardous gas hose vents flammable gases from cabinet
- Line purge feature to prevent air hose freeze ups in cold temperatures, Purges debris, flammable mixtures, and gases

#### Car Vacuum (optional)

- Attaches to the side of unit.

#### Vault

- High Security Steel Vault
- Auto-reports Coinbox Collections
- Built In Intrusion Alarm

# AWM300 Series AIR Machines

## TAKE THE GUESSWORK OUT OF MACHINE PERFORMANCE

**Designed for maximum visibility** - LED dome light, Front Panel Light, Front, and Back AIR signage draws attention and customers.

**Free Air Mode** - Provide customers the convenience of a full featured digital air tire inflator while taking advantage of Protel's IVS monitoring to ensure maximum up-time and customer service.

**Optional EMV Card Reader** - EMV Chip technology provides the latest card security, plus Apple and Android pay, to provide additional security. Contactless credit card transactions provide an added layer of protection from COVID-19 and other viruses.

**Use Mobile payments for added security** - Mobile payments don't store credit card numbers.

**Free tire pressure check** - Simply attach the air chuck to your tire until you hear an audible beep, then read the tire pressure on the display.

**To fill your tire** - Adjust the setpoint to the desired tire pressure. Start the machine by pressing the "Free Air" button or by using your credit card. Then attach the air chuck to your tire, an audible beep will indicate when the target pressure has been reached.

Weight & Dimensions  
115 lb. (12" x 13.6" x 56.5")

Digital Tire Inflator with Credit Card

**Optional chuck holder** - Provides a convenient method for customers to return the 30' coiled hose. Works in conjunction with Protel's optional heater to ensure the air chuck does not freeze in cold weather conditions.

**Optional heater** - Thermostatically controlled heater provides warm air to the compressor at start-up, improving performance and reducing wear. Also ensures optimal digital air performance in cold weather as well as reduces customer stem valve freeze-up in temperature down to -20° F.
