Protel's PTE 500 Mini-Payment Tower Series

*   Do you want to add a <u>Credit Card Reader</u> to your AVW Machine?
*   Do you want to add <u>Digital Air and a Credit Card Reader</u> to your AVW Machine?

It's a <u>Simple</u> and <u>Easy</u> Conversion with the PTE 500 Mini- Payment Tower

Card Reader & Digital Air Dual Service (Air & Vac) PTE 530

Protel's Mini-Payment Tower Series is compatible with all <u>Makes</u> and <u>Models</u> of Air Vacuum Water machines. The payment tower works in conjunction with an under the machine coin vault. The payment tower is a heavy gauge stainless steel cabinet that provides the ultimate in technical serviceability and security. All mini-towers are field configurable to provide six - (6) modes of operation, i.e.

(1) PTE-540: Dual coin drop mechanical mechs for air only or air/vac machines.

(2) PTE-500: Single coin drop mechanical mech with card reader for air only machine.

(3) PTE-510: Single coin drop mechanical mech with card reader, and selector buttons to enable air or vac for air/vac machine.

(4) PTE-520: Single coin drop with card reader and digital air for air only machine.

(5) PTE-530: Single electronic coin drop mechanical mech with card reader, digital air and select buttons to enable air or vac.

(6) PTE-550: Dual coin drops with stand-alone digital air for air only or air/vac machines operating without Protel's ASY400 controller.

The PTE-500 Mini-Payment Tower Series of housings provides for easy "Plug & Play" field upgrades from one model of tower to another with swap-out pre-wired and connector-ized front panels.
