Protel's Air / Vacuum Credit Card True-Up / Reconcilation Firmware

**How much money did you lose today?
ADD $$$$ to your bottom line.**
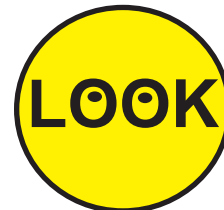

STOP ➤ **Stop losing Money**

STOP ➤ **Stop Credit Card Fraud**

* Do you know how much money you are losing each month due to credit card fraud?

* Do you know which of your machines are losing the most money due to fraud?

* Do you know what type of fraud is robbing you of your profits?

* Do you know if your bank is paying you for all of your vends?

* Do you know how many card reader vends fail to complete and why?

LOOK

Protel's new credit card reconciliation feature gives credit card machines the ability to true-up revenue collected on card transactions with actual vended operations. This feature will track every credit card transaction and generate reports to show the following:

• How many card transaction were attempted on each machine?
• How many credit card transactions resulted in the air or vacuum machine turning-on?
• A report to show the failed transactions and why they failed.
• A report to show the location and how much fraud occurs on each machine
• A report on what type of fraud is occurring at each location.
• Reconcile reports to verify that all valid transactions have been paid by the card issuer.
• Give summary and detail reports on uncollectable revenue.

GO PROTEL

The above new features will be complimentary on all new and in place machines through a remote firmware download. A site visit will not be necessary to implement these new features. Available summer 2015.
